

MEDICAL HANDLES

Made in Germany

Durability and Safety

With our products, you'll have peace of mind knowing that your medical facility is safe and secure.

Design

Designed by industry professionals, our products are specifically crafted to give patients the highest level of comfort possible.

Comfort

We believe everyone deserves comfort and convenience. Our products are designed to help patients improve their lives.

Our portfolio of high quality medical products is focused on a simple goal:
The best possible support for patients and nurses during remobilization and in everyday life.

- The medical grab handle ARRIGA has an stepless height adjustment which provides patients and nursing staff with optimum support during remobilization and gives them more freedom of movement and independency in everyday life.
- The ergonomically designed grab handle with stepless height adjustment, automatic pull-back mechanism and practical one-hand use has been specially developed for bedridden patients with limited mobility and can be used universally in both hospitals and nursing homes. The award-winning design combines comfort with durable materials.
- The adjustable height is suitable for lifting poles and patients of different sizes. This makes the ARRIGA one of the most flexible medical grab handles on the market.
- The durable webbing is 38 mm wide and protected against moisture & wear and tear with a special impregnation layer.
- Different button colours allow easy individualisation or marking for use in different sections.

TECHNICAL INFORMATION

- Automatic roll-up system
- One-hand operation
- Colour: handle light grey, adjuster unit dark grey
- Webbing: 38 mm wide with impregnation, colour dark grey
- Grap handle loop: Ø 55 mm with rubberised anti-slip
- Total length: 370 – 630 mm
- Adjustable range: 260 mm
- Bearing capacity: 15.000 pulling movements (75kg) from the lying position
